

Projects completed in the last 2-3 years

Switched heating in the restrooms to electric heat (to save monthly natural gas customer charge) and replaced damaged vents with permanent solution. Also added a concrete

sloped pad for better access to restrooms.

Built a new bread oven and continued repairs on the older oven. (Unfortunately the new oven suffered damage and will need to be replaced.) Poles are in place for building a cover for the oven.

Chimney / Fireplace work – added extensions to the chimneys. Replaced damper handles in two fireplaces. Replaced missing bricks in two fireplaces and tuckpointed some of the others. Replaced the stonework around the fireplace in the Captain's cabin. Had the chimneys cleaned in 2019.

Replaced 10 logs in the cabin walls and chinked them. (One remains to be done.)

Started a Prairie Garden in 2018 and have a small plot next to it for Maize.

Replaced logs in the front of the stockade and working on repairing the gate.

Repaired the front of the Forge cabin and straightened up the Washerwoman shed.

Water sealed the cabins – plan to seal the restroom building in the Spring.

Large Projects still to be done

1. Finish removing the surround on the chimneys and replace with stucco.
2. Build a cover over the ovens.
3. Treat the walls of the restroom with water sealer.
4. Repair the fascia around the cabin roofs.
4. Level some of the ground for better drainage.

As always there is general maintenance to be done on the cabins and the grounds. We try to have several work days during the year for various projects.

Our camp is maintained by volunteers and any help is greatly appreciated.

Feel free to contact either of our co-directors to volunteer at the camp.
